

### Transferring Injections From Our Office

*If you are currently receiving injections here at Park Cities allergy and Asthma and wish to get injections elsewhere, please follow the listed instructions:*

1. Make an appointment with Dr. Schroeder to discuss this change in service.
2. Find a board-certified allergist to administer your injections and make an appointment to become an established patient. Be aware that not all allergists are board certified, and Dr. Schroeder requires that certification in order to transfer care. You can find a list of these providers at <https://acaai.org/>
3. Transfer your serum one of two ways:
  - Come pick up your serum and physically bring it to the other location. Please make sure to bring ice/ice packs to transfer your serum with, as it must stay cold.
  - Pay a \$35.00 fee to have our office mail the serum for you. If you prefer this, please fill out the following information so that our office can charge your card upon mailing.
